

**US Army Corps  
of Engineers®**

# South Pacific Division

## Relevant, Ready, Responsive, Reliable

South Pacific Division encompasses one-fifth of the contiguous 48 states. Established in 1888, it is one of the Corps' eight Regional Business Centers nationwide. Operating Districts are headquartered in Albuquerque, Los Angeles, Sacramento, and San Francisco.

We support economically viable and environmentally sustainable watershed management and water resources development in California, Arizona, Nevada, Utah and New Mexico. We are also responsible for parts of Oregon, Idaho, Wyoming, Colorado and Texas. The Sacramento, Los Angeles and Albuquerque Districts support the Army and Air Force throughout the region.

We balance the needs of security, economic development, and the environment to insure tax dollars are well spent. Our structured analysis of costs and benefits ensure that taxpayers and local project sponsors get a sound, environmentally sustainable return on investment.

We have re-doubled our efforts to engage Federal, State and local agencies, stakeholders, and the public in meaningful dialogue. We have the major resource agencies at the table with us helping us make decisions.

We evaluate permit applications for essentially all construction activities that occur in the nation's waters, including wetlands under the Clean Water Act. The mission of the Corps of Engineers Regulatory Program is to protect the nation's aquatic resources, while allowing reasonable development through fair, flexible and balanced decision making for the regulated public.

Environmental programs encompass clean up of hazardous, toxic, and radioactive waste (HTRW) for the military as well as environmental mitigation and restoration for civil works projects and programs.
